

Run tests from main

```
Max Element: -1
Ascending Order
Constructing intList
100
Max Element: 100
Ascending Order
200 100
200 300 100
200 400 300 100
Not Ascending Order
200 400 300 500 100
Not Ascending Order

Max Element: 500

This is another list
0 100 200 300 400 500 600 700 800 900
Max Element: 900

Two items are erased from the first list
200 500 100
Max Element: 500

Program ended with exit code: 0
```

First is the element with 0 elements, this returns -1 and is in Ascending order according to the specifications.

The list is constructed and the ascending test is done two more times.

The maxItem test is then ran and finds the correct element. Some nodes are deleted at the end and another maxItems test is ran which gives the correct display.
